P. 80

CQ RADIO AMATEURS!

MAY 1952

Special Mobile Issue

35c

6.Netherlands Antilles: The Govt. of Netherlands Antilles transmitted a notification to the Sec. General of the LT.U. on Jan. 16th, 1952, "That radio amateur stations are now allowed in the Netherland Antilles."

7. Thailand: Amateur radio stations are forbidden by law. There are indications that the law is not strictly enforced and that responsible authorities apparently permit clandestine operation in certain instances which are not officially divulged. The Commission should presume that amateur radio operations are officially forbidden.

8. Australia (???): Status not yet reported.

9. Austria: Status not yet reported.

The Commission will be informed on the status of amateur operations in Iran, Australia, Austria and the states of Cambodia and Laos as soon as the Dept. receives the official reports from the U.S. foreign missions involved.

Sincerely yours,
Francis Colt de Wolf
Chief Telecommunications Policy Staff.

Our Cover

Milwaukee's Mobile Unit

W9HRM/M is housed in a new one and one-half ton International Metro Truck. The roof is insulated with spun-glass, the floor with two inches of cork and the space between the inner and outer walls is filled with cork. A gasoline burning heater supplied from the fuel tank of the truck supplies heat for all-weather operation.

A rigid "T" shaped table along one wall provides two operating positions. The first position consists of a Collins 32V-2 and a HRO-7. The second position consists of a Harvey-Wells Band Master and a National NC-57B headed by a RME-152. The Harvey Wells transmitter is supplied with both a.c. and dynamotor power supplies so that it can be used for mobile operation from the storage battery in the truck. For such mobile operation

while in motion a second receiver is provided consisting of a Gonset Tri-Band feeding a Motorola P-69 i.f. strip. All equipment is rigidly mounted in place.

An additional Motorola P-69 Receiver is provided, this one xtal controlled on the Milwaukee Police Department Station KSA-596.

All power wiring is installed in rigid conduct, with circuit breakers and standard outlet receptacles. When commercial a.c. power is not available it is supplied from a PE-75 2½ kw., gas driven generator carried in the 2-wheel stake-type trailer. An advantage of the trailer mounted generator is that it can be placed at a distance from the truck and the noise thus greatly reduced.

A bench seven feet long runs along part of the wall opposite to the one occupied by the operating table. This bench serves as a resting place for extra operators and messengers, and under its hinged top are bins for storing cables, antennas, tools and spare parts.

Two stainless-steel collapsable 40-foot antenna masts are provided. A folding ten-meter ground-plane antenna is also available. All antenna leads are in co-ax with co-ax antenna relays. The roof mounts four antennas, one each 2, 10, 75-meter and one for the police receiver. Co-ax feed-thrus are provided for feeding the external antennas, when used.

A Leece-Neveile a.c. type generator provides extra battery charging power when the truck engine is in operation. A trickle charger built into the truck is used to insure a full battery for the start of any operation.

H. Charles Kaetel, W9SNK
Director of Mobile Activities
MILWAUKEE RADIO AMATEURS' CLUB

A Monthly Departmer

Salute to the mobiles! So many of the YI mobile these days, and after this issue of warrant there'll be many many more. Mobi ing is especially appreciated by husband/ teams, and with many of them the OM's ca for the "big rig" and the XYL's call for tl station.

A suggestion for some of you YLs whe busy with jr. ops to get much operating the day on the home rig—go mobile! While drives, and the kiddies look out the winc can rag-chew. That's what W9IES, Nel "Now that we're mobile," she says, "I fin more contacts than on the big rig, for that's roundtables with locals after the youngste bed. When we're driving around town I up the mike and start shouting. It's no powerful little job, only runs 4½ watts, ha in the final, but it has gotten us out to Wash., for a very nice QSO."

YL Get-Together

A reminder to the Chicago area YLs. Do the YL get-together scheduled for May 23-24 at the Hotel President, 2054 N. Lincoln Ave.,

**Address all letters and correspondence 24th Street, Los Alamos, New Mexico.*
